

Excellence is OUR Standard.

Established in 1979, Lucas Greenhouses has developed a reputation in the industry for growing the very best product and providing the finest customer service. We find great pride in partnering with our customers, helping them to grow and achieve success. No matter the size of your company or order, our unique approach is to provide each customer and order with the personal attention they desire.

Lucas Greenhouses is located in beautiful Southern New Jersey, just a short drive from Philadelphia and within 2 hours of both New York City and Baltimore. With over 1.2 million sq. footage of greenhouses and 190 employees, we have received numerous industry awards, including the prestigious Greenhouse Grower Magazine "Grower of the Year" award in 2009 and then again in 2012.

We hope these pages help you to become familiar with our Root & Sell Programs, offered exclusively through the broker network. We thank you for your interest in our product and look forward to serving you this year and beyond.

Lucas Greenhouses is a top notch growing facility. With over 18 years of rooting experience, we have produced 200 million rooted cuttings and 50 million geranium liners. Our facility features grow lights, heated and flood floors, a computer controlled environment, natural ventilation and ozone water treatments.

Offerings

We offer a full spectrum of Syngenta bred geraniums, New Guinea impatiens, GoldFisch vegetative plants, and Kwik Kombo combination liners. We have added the majority of the Selecta vegetative genetics line, including the popular MiniFamous calibrachoa line and Trixi mixes. Sunpatiens, hiemlais begonias, Paradise New Guinea impatiens, and other select vegetative material help to complete our line of spring material. We also supply rooted Yoder and Gediflora garden mums and a full line of poinsettia liners. Our fully rooted poinsettia liners are grown in the Oasis Wedge 10 strip, which advocates uniform plant development and provides safe protection during shipping and handling.

ORDERING

All Lucas Young Plant Orders must be placed through our extensive broker network. For a list of brokers, please contact us or visit www.lucasgreenhouses.com.

Orders based on availability must be placed by 6pm EST Monday for shipping the same week. One order may be placed for all products, they do not need to be separated by item or box.

“Lucas Greenhouses has steadily grown over the years because of its devotion to excellence.”
– Henryville, PA

CLAIMS

Shipping/transportation and shortage claims must be filed with the broker and reported to Lucas within 48 hours of receipt of cuttings. Cutting quality claims must be filed with the broker and reported to Lucas within 14 days of receipt of cuttings. Details of the claim should include the nature of the problem (frozen cuttings, small cuttings, poorly rooted, etc.). Varieties impacted and quantity of cuttings affected should also be included. Pictures of the affected material should be included and/or the sales rep should visit to verify the claim.

CANCELLATIONS:

No orders may be cancelled in full, or part, within two weeks prior to cuttings being stuck. Cancellations are the responsibility of the broker.

SHIP WEEKS

For spring, the ship weeks run from the beginning of October through late June/early July. Our mums ship weeks are May through mid-July, while poinsettia ship weeks are late June/early July through early September. Due to the limitations of shipping to Category 1 states at certain times of year, because of the Japanese beetle regulations, the following states will not be available for shipments from week 23 to 40: Arizona, California, Hawaii, Montana, Nevada, Oregon, Utah, Washington. This does not include poinsettias, which are rooted in an inert media and exempt from the restrictions.

SHIPPING

We ship using FedEx, truck delivery, or customer pickup (or air for poinsettias). CPU's are available Tuesday after 1pm for orders not based on late availability. Call ahead to schedule exact date and time.

When delivered by truck, the cuttings arrive on our convenient to unload carts, over 80% arriving via temperature controlled trucks.

Q. How do I find out pricing and/or place my Rooted Cuttings order?

A. All Rooted Cuttings orders must be placed through the broker network. Contact your favorite broker today for pricing and to place your order.

Q. How advanced will my Rooted Cuttings plants be when I receive them?

A. Depending on the crop, most plants ship out 4-5 weeks after stick.

Q. Besides getting great quality plants, what are some of the benefits of bringing in Rooted Cutting plants from Lucas Greenhouses?

A. Small order minimums allow you to have a more diverse selection for your customers. Our extensive offerings allow you to stay organized and save cost by purchasing from one dependable source. We have an experienced growing staff available to help give recommendations and answer questions.

Q. When should I have my Rooted Cutting orders in to my broker?

A. The earlier you can place your order, the better we can help ensure the availability of what you want, when you want it. We suggest that Spring Rooted Cutting orders reach us by early October and Rooted Cutting Poinsettia orders by late February to guarantee availability. Please also consider that your broker will need time to process the order before sending it to us as well. Check with your broker for more specific ordering dates. We do accept late orders subject to availability.

Q. How do I find out what varieties you offer?

A. Your broker will have a complete listing of available varieties & sizes in our Rooted Cutting Programs. You can also obtain a copy of our variety listings on our website www.lucasgreenhouses.com.

Q. How will my order ship?

A. The Lucas Greenhouse shipping team works hard to accommodate your delivery requests and needs. With our ever growing fleet of tractor trailers and straight trucks, we are ready to deliver what you need, when you need it. To make for a fast and efficient delivery, all our trucks are equipped with lift gates and all your plants are shipped on our convenient to unload carts. Our young plants can be delivered by grower truck, Fedex (also can go air in the case of poinsettias), or can be picked up at our greenhouse. Over 80% of our young plants ship to your door on temperature controlled trucks. Please, check with your broker for freight rates & minimums.

Q. Can I schedule my order to be a Customer Pick Up?

A. With our 20 bay loading dock and fully staffed shipping department, we are prepared to quickly handle vehicles of all sizes. If you would like to schedule your order to be a CPU, just indicate that to your broker.

Q. Will tags come with my order?

A. Tags can be purchased with many of our rooted cuttings. They will come directly from the tag manufacturers, separately from your plants. Orders should indicate if no tags are necessary, a tag is required for each cutting, or if an alternate ratio of 1 tag for every 4 cuttings (1:4) is preferable for multiple plantings in a pot or basket.

Q. What if I experience any problems with my order?

A. Complete customer satisfaction is our goal. If you do experience any problems with your order, please contact your broker immediately. Cutting quality claims must be filed with the broker and reported to Lucas within 14 days of receipt of cuttings. Details of the claim should include the nature of the problem (frozen cuttings, small cuttings, poorly rooted, etc.). Varieties impacted and quantity of cuttings affected should also be included. Pictures of the affected material should be included and/or the sales rep should visit to verify the claim.

Q. What if I have a cultural or growing question regarding the plants I am receiving?

A. If you have a cultural or growing question do not hesitate to contact us either via phone 856-881-0234 or you can visit our website www.lucasgreenhouses.com

Q. Does Lucas Greenhouses offer finished product?

A. Yes, Lucas Greenhouses is the perfect source for high quality finished plants. We offer a full line of annuals for every season, starting in the spring with many different types of hanging baskets, bedding flats, #4.5 pots and combination pots & planters. To get you through the heat of summer, we have created an excellent summer crop line. For fall, we produce beautiful asters, mums & pansies. For Christmas, we offer many sizes and varieties of poinsettias. We also offer tulips, hyacinths, daffodils & pansies for the Easter Season.

Q. What if I want to order finished plants from Lucas Greenhouses... who do I contact?

All Finished Plant orders should be placed directly with Lucas Greenhouses. Contact us via phone 856-881-0234, fax 856-8812502, or visit us online at www.lucasgreenhouses.com to place your order or find out additional information. If you would like to be placed on our weekly availability fax or email just give us a call or send us an email at sales@lucasgreenhouses.com.

Rooted Cuttings Availability

Live availability of rooted cuttings can be found by clicking on the Lucas Availability/ePicas link. Growing and culture information, as well as a picture, can also be found for most varieties. There is also the ability to export to an excel file and print this information out.

Rooted Cuttings Program *Current Availability/ePicas*

With a full line of top genetics from leading breeders Ecke, Syngenta Flowers, Selecta, and Dummen, the Lucas Poinsettia Liner Program is your one source for a complete program.

Our fully rooted liners are grown in the Oasis Wedge 10

Strip, which advocates uniform plant development and provides safe protection during shipping and handling. The unique shape of the Oasis Wedge also encourages downward root growth, which results in rapid transplant "takeoff".

Poinsettia Liners are available for shipment starting in early July through mid-September.

We also are now Independent Root N' Sell carrying the full spectrum of Syngenta bred geraniums, new guineas, Goldfish vegetative, Kwik Kombo combination liners and Yoder mums.
